## Exclusive Powder Coating Process

DSI is an industry leader in Powder Coated Aluminum Products. State-of-the-art technology is used to provide a high-quality and durable finish that is more resistant to the effects of impacts, chemicals, ultra-violet light, moisture, and extreme weather conditions.

The process begins with a system certified by the Powder Coating Institute (PCI) and continues with the American Architectural Manufacturers Association (AAMA) / Fenestration and Glazing Industry Alliance (FGIA) verifying our Powder Coating. These stringent processes provide homeowners with peace of mind in their investment.

Our Aluminum Lifetime Limited Warranty includes a Fade Warranty as well as a Salt and Abrasive Environments Warranty providing one of the best warranties in the industry.

**1** The raw premium-grade aluminum is inspected to be free of blemishes and is not exposed to the outdoor elements.

**2** The product enters a heated acidic cleaning stage to remove extrusion debris and fabrication oils.

**3-6** **Clean:** City water rinse  
**Cleaner:** Recycling reverse osmosis water rinse  
**Cleanest:** Pure reverse osmosis water rinse  
**Sealer:** Dried-in-place aluminum sealer

**7-8** A 200 MPH air blast removes water drops from the pre-treated aluminum. A convection oven completes the dry-off process.

**9** Powder is applied with 18 automated and 2 manual spray guns. Compressed process air is dried to -35°F Dew Point for superior adhesion.

**10** The powder coating is then bonded and adhered to the aluminum substrate in a 400 degree cure stage.

The Westbury® Bella Cavo Horizontal Cable Railing is here to redefine outdoor spaces. With its modern horizontal cable design, this railing system offers a stylish solution that complements today's architectural trends. Crafted from premium materials and designed for lasting durability, Bella Cavo delivers on both performance and aesthetics, providing a clear view and an effortless sense of style to any deck or balcony.
